Climate disasters CLIMATE CHANGE	Putting people to work in good paying jobs tackling climate change.	CNN: "The Lynchpin Climate Policy Of Congressional Democrats' \$3.5 Trillion Budget Reconciliation Bill Would Spur Massive Job Growth." "The lynchpin climate policy of congressional Democrats' \$3.5 trillion budget reconciliation bill would spur massive job growth over the next decade, a new analysis finds. A report from independent firm Analysis Group, shared exclusively with CNN, finds that if Congress passes a \$150 billion Clean Electricity Payment Program, it would increase the US workforce by 7.7 million new jobs and add nearly \$1 trillion to the economy by 2031. The analysis was commissioned by Evergreen Action and the Natural Resources Defense Council, environmental groups that have advocated for stronger renewable energy policies." [CNN, 9/9/21]
		Working Its Way Through Congress Could Cut U.S. Greenhouse Gas Emissions By Nearly A Gigaton." "The reconciliation bill working its way through Congress could cut U.S. greenhouse gas emissions by nearly a gigaton by 2030, according to a new report." [Scientific American, 9/15/21]
